Status of the Claims

Applicant's election without traverse of claims 24-28 in the reply filed on 11/20/2006 is acknowledged.

In reply to the restriction requirement mailed on October 20, 2006, Applicant elected the claims of Group I and species relating to cartilage repair (Claims 24-28).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 28 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The limitation of "steps comprising surface treatment of a thick permeable material in a manner that creates a modified surface layer" fails to positively set forth structure that defines the particular product. As worded the product by process steps is ambiguous, in that, the "metes and bounds" of the scope of the claim are not readily discernable to one with ordinary skills in the art. Therefor, the claim, in so far as definite, will be treated as a product claim where in the segment has a surface layer.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 24-28 are rejected under 35 U.S.C. 102(a) as being anticipated by Meenen et al [6319712].

Meenen et al discloses a synthetic membrane segment for surgically treating damaged cartilage in a mammalian joint, comprising a membrane segment made of a synthetic polymer, wherein said membrane segment is hydrophilic and permeable to water but is not permeable to surface-active phospholipids or hyaluronate

Molecules (see column 4, lines 30+), and wherein said membrane segment has at least one surface suited for use as an articulating surface in a joint, wherein said articulating surface is designed to interact with water, surface-active phospholipid molecules, and hyaluronate molecules in natural synovial fluid, after surgical implantation into a joint, in a manner that sustains lubrication of said articulating surface by said water, surface-active phospholipid molecules, and hyaluronate molecules (column 6, lines 20+).

Claim 25, the membrane is affixed to a resorbable scaffold that will support cell growth, including chondrocyte and cartilage regeneration (column 1, lines 45+).

Claim 26, the membrane can be trimmed prior to application to the damaged surface area on the cartilage surface.

Claim 27, see anchoring sutures in column 5, lines 45+.

Claim 28, in so far as the final product is defined by the method step, the claimed product fails to distinguish over the same as disclosed by Meenen et al. Meenen et al teaches a modified surface layer.

Response to Arguments

Applicant's arguments with respect to claims 24-28 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
